

# MUSIC SHARE

We believe in the power of music to connect people back to the power of themselves.

---

## OUR MISSION

Provide an emotive music listening experience and alleviate symptoms of social isolation

## WE PROVIDE SENIORS WITH:

- Music that is meaningful and memorable
- Accessible and individualized programming
- Entertainment in the comfort of their own home

# DROP-OFF PROGRAM

## PERSONAL PLAYLISTS

Music Share provides our 'Music Preference Questionnaire' to residents giving them the opportunity to participate and shape their personal experience.

We provide personalized music playlists for up to 20 residents\* based on their individual responses.

Playlists are maintained and updated monthly, are accessible on site, and can be downloaded to any device with Spotify.

\*refer to price list for additional playlist options

## EQUIPMENT DROP-OFF

All necessary program equipment is dropped off at the start of each month and remains on site for staff use for the whole month.

In the event of any technical issues or damages Music Share will drop-off new equipment within the week.

"Music Share can improve quality of life for our residents, as well as any other seniors suffering from feelings of loneliness or isolation"

—St. George Community Care Centre

## INCLUDED TECH

Music Share provides 1 iPad, 1 wireless Bose speaker\* and a unique Spotify account is created for your LTC community.

All playlists are downloaded prior to drop-off so there is no need for internet access.

All equipment comes with protective cases and any and all damages are covered by Music Share.

\*refer to price list for additional equipment and tech options

## MUSIC LISTENING

During these difficult times while Music Share is not able to provide in person programming, we are striving to stay on the forefront of combining technology and care.

By connecting residents back to cherished memories we aim to reduce the effects of loneliness and isolation amongst senior populations.

The health benefits of music listening have been well documented and include, improvements in memory and cognition, reductions in anxiety and improved mood and behaviour.
